

It's a great day for a Swapp

Fernando Ortega
Guillem Ferrer
José Gutiérrez

What is swapp?

A platform to swapp those items that you don't need more or you just simply exchange for others.

We want to promote the socially responsible consumption.

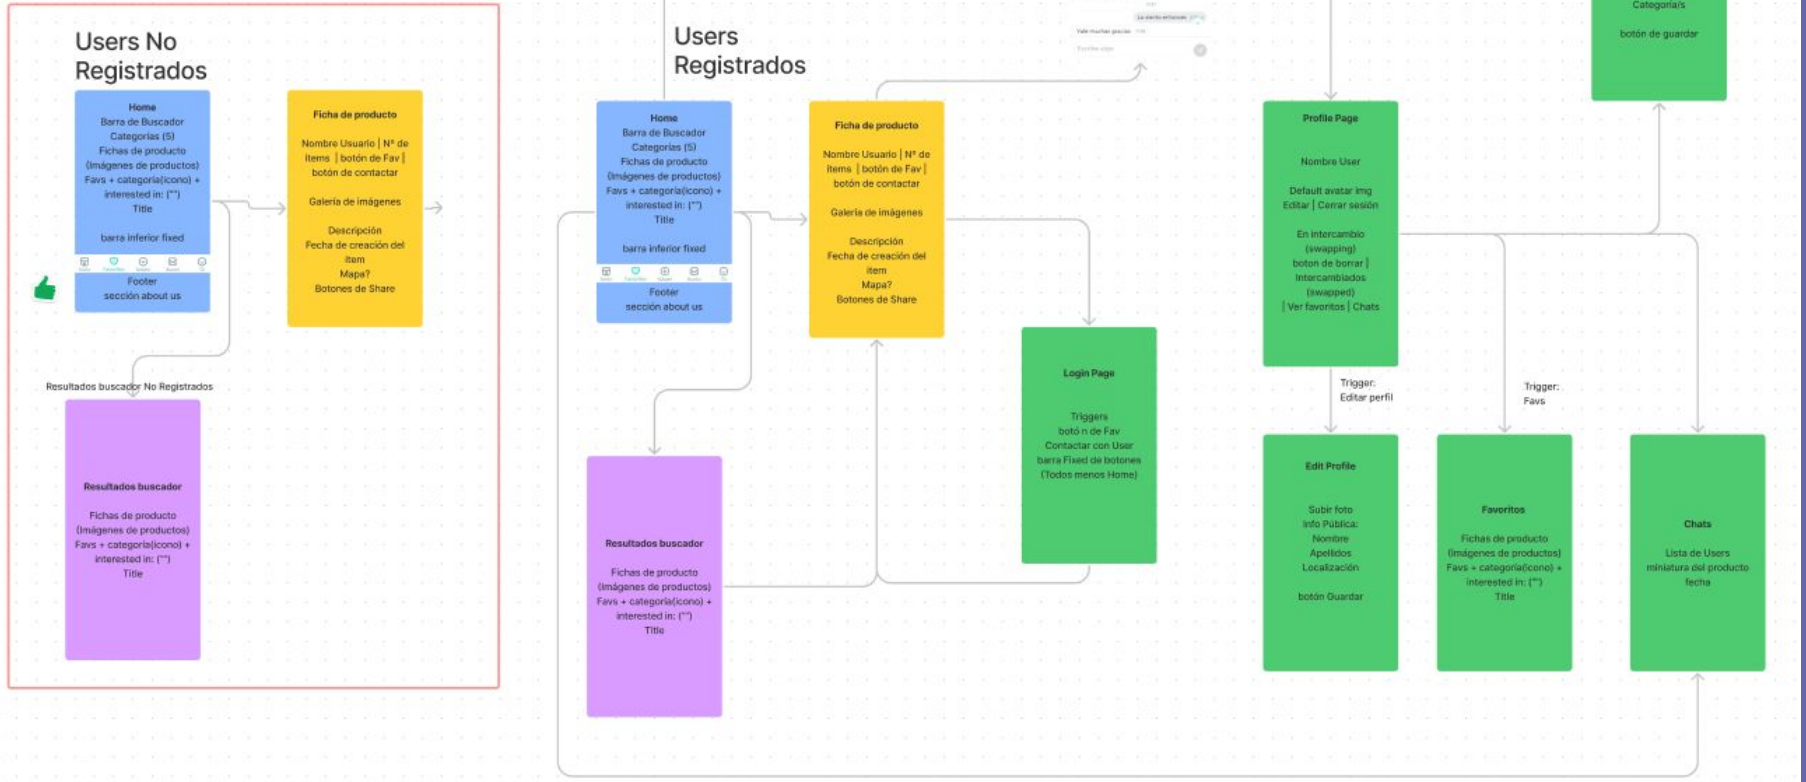

The biggest challenge

To make it works
as expected!!

Integrate all the technologies
with our limited knowledge

React / Mongo / Cloudinary...

swapped

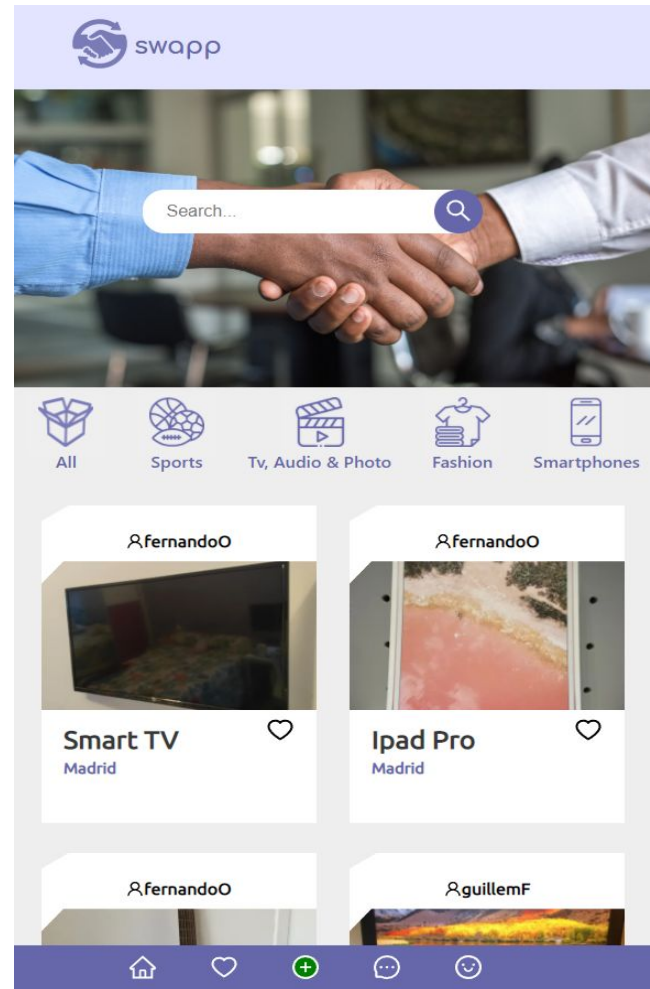

The big mistake

Not having a clear scope about how the app would escalate.

Start the project with a weak software structure, more based in the JS & HBS tech than in REACT

Demo swapp

Thanks!!

Now it's your time to swapp
